NEW SERIES

KEGEMA

Tools

Optional Tools and Applications

EOT

Oscillating Knife Tool

Ideal for mid-density materials using various blade types.
Materials: Cardboard, composites, leather, foam, PVC

VCT

V-Cut Tool

V-cutting for corrugated or beveling glass-like sheets.
Adjustable angles: 0°, 15°, 22.5°, 30°, 45°
Materials: Honeycomb, grey board, acoustic panels

OKT

Kiss-Cut Tool

Top layer cut without damaging backing – perfect for vinyls.
Materials: Stickers, car wraps, phone films, magnets

DKT

Drag Knife Tool

Non-vibrating cutter; cost-effective, low maintenance.
Materials: Soft PVC, PP paper, phone film, vehicle wraps

DRT

Rotary Knife Tool

High-speed servo motor drives round/hex blades, perfect for woven materials.
Materials: Textiles, leather, carbon fiber, non-wovens

CWT

Creasing Wheel Tool

Creases medium-density packaging material with interchangeable widths.
Materials: Boxes, card stock, corrugated sheets

POT

Pneumatic Knife Tool

Powered by compressed air for dense, hard materials.
Materials: Foam, EVA, rubber, graphite board, PTFE, asbestos-free sheet

MT

Milling Tool

High-speed spinning for hard and foam materials.
Materials: Acrylic, MDF, foam board, PVC foam

FBP1625

Working Range	1600*2500MM / 1800*2500MM	Rated Power	11KW
Product Size	3560*2350*1221MM / 3560*2550*1221MM	Rated Voltage	220/380V±10%
Cutting Thickness	≤50mm (accept customization, ≤150mm)	Interface	Enترنت port
Cutting Speed	0-1800MM/S	Control Panel	LCD touch screen
Cutting Tools	Tools can be easily changed, with oscillating knife, circular knife, kiss-cut tool, v-cut Tool, CCD Camera, and so on.		
Cutting Material	Paperboard, grey board, corrugated board, honeycomb board, KT board, foam board, car sticker, PP Adhesive material, EPE, EVA, PVC board, acrylic board, and so on.

Oscillating Knife Tool

The electrical oscillating tool is super suitable for cutting the material of medium density. Coordinated with various kinds of blades, applied for cutting different materials

Application Foam board, Honeycomb board, Carpet, Corrugated, Cardboard, KT board, Gray board, Composite materials, Leather

Kiss-Cut Knife Tool

The kiss cut tool is mainly used for cutting vinyl materials (labels). Aol cut makes it possible that the tool cuts through the top part of the material without any damage to the bottom part. It allows high cutting speed for material processing

Application Sticker, Reflective Materials, Self-adhesive Vinyl, Label, Vinyl, Engineering Reflective Film, Double-layer Adhesives

V-Cut Knife Tool

Specialized for V-cut processing on corrugated materials, AOL V-Cut Tool can cut 0°, 15°, 22.5°, 30° and 45°

Application Soft Board, KT Board, Corrugated Board, Packing Box, Medium-density Material V-cuts, Carton Packaging, Hard Cardboard

Creasing Wheel Tool

A selection of creasing tools allows for perfect creasing. Coordinated with the cutting software, the tool can cut the corrugated material along its structure or the reverse direction to have a finest creasing result, without any damage to the corrugated material's surface

Application Packing Box, Folding Card, Corrugated Board, Carton

Marking Pen

The cylinder is controlled by the solenoid valve to realize the function of marking. Suitable for leather, fabric and other materials to record, order, count, proofing

Application Leather, Fabric, Cardboard and other materials

Circular Knife Tool

Circular knife puts the materials by the high-speed rotating blades driven by the servo motor. The tool can be installed with circular blades and decagonal blades, etc. Which are especially suitable for cutting woven materials

Application Textiles, Canvas, Leather, Fabric, UV fabric, Carbon Fabric, Glass Fabric, Carpet, Blanket, Fur, Woven Fabric, Composite Double, Multi-layer Material, Flexible Plastic

Drag Knife Tool

AOL drag knife tool can perfectly cut materials with the thickness up to 5mm. Compared to other cutting tools, it is the most cost-effective one that allows for the fastest cutting speed and lowest maintenance cost

Application Backlit Film, Sticker, PP Paper, Folding Card, Flexible Material less than 3mm thickness, Advertising Materials KT Board, Flexible Plastics, Mobile Phone Film

Milling Knife Tool

With imported spindle, it has a rotating speed of 24000 rpm. Applied for cutting hard materials with the maximum thickness of 20 mm. The customized cleaning device cleans up the production dust and debris. The air cooling system extends blade life

Application Acrylic, MDF Board, PVC Board, Display Stand

Pneumatic Knife Tool

Driven by compressed air, is especially for cutting hard and compact materials. Equipped with different kinds of blades, it can make different process effect. The tool can cut the material up to 100mm by using specialized blades

Application Asbestos Board, Asbestos Free Board, PTFE, Rubber Board, Fluorine Rubber Board, Silica Gel Board, Graphite Board, Graphite Composite Board

Punching Tool

Making holes, V shape punch and Flat punch

Application Leather fabric cut: 1. V-shape punch, 2. Flat punch
